

Aleksandra Aitullina is working as a clinical pharmacist in big tertial hospital (Paul Stradins University hospital) since 2015. Also now she is a teaching staff at Riga Stradins University (RSU), department of Pharmacology and 1st year PhD student. She received her Pharmacy degree and after Master Degree in clinical pharmacy at RSU. During study years she was working in community and hospital pharmacies as well in Latvian Biomedical and biotechnology centre, where Aleksandra was participating in the projects in the molecular biology field (human genetics). Now her research topics are more connected with drug pharmacokinetics and rational drug use in hospital setting.
